EQUASP project

The aim of EQUASP project is the definition and implementation of an online documentation and monitoring system for the quality assurance (QA) of study programmes (SPs) in the Russian Federation, consistent with the European Standards and Guidelines for Quality Assurance, in order to promote their quality, transparency and comparability at national and international level.

The first steps of the project regarded the definition of the EQUASP Standards and Guidelines for internal QA of SPs. Contextually, the questionnaires for the monitoring of the SPs' quality perceived by stakeholders have been defined.

The following steps of the project regarded the identification of the responsibilities and facilities for the documentation of the QA of SPs in the Partner Universities and the design and production of the software for the on-line documentation of the QA of SPs and of the software for the on-line monitoring of the SPs' quality perceived by stakeholders. The final steps regard the implementation of the responsibilities and facilities and of the software for the on-line documentation of the QA of SPs in the Partner Universities.

ROSTOV-ON-DON workshop

After the workshop in Yekaterinburg held on July 6th, 2016, devoted to the discussion of the technical aspects and possible improvements of the EQUASP software and to the presentation and discussion of the first draft of the documentation of the QA of the SPs involved in the EQUASP project, the Rostov-on-Don workshop will be devoted to the presentation, discussion and sharing of the improvements of both the software and SPs' documentation, also in preparation of the Final Conference of the project.
